

Lesson 6 APP Custom

1. Purpose

Execute “2” action group file in folder “**Appendix/MaxArm Action Group File**” by app custom function

2. Operation Steps

2.1 Notices

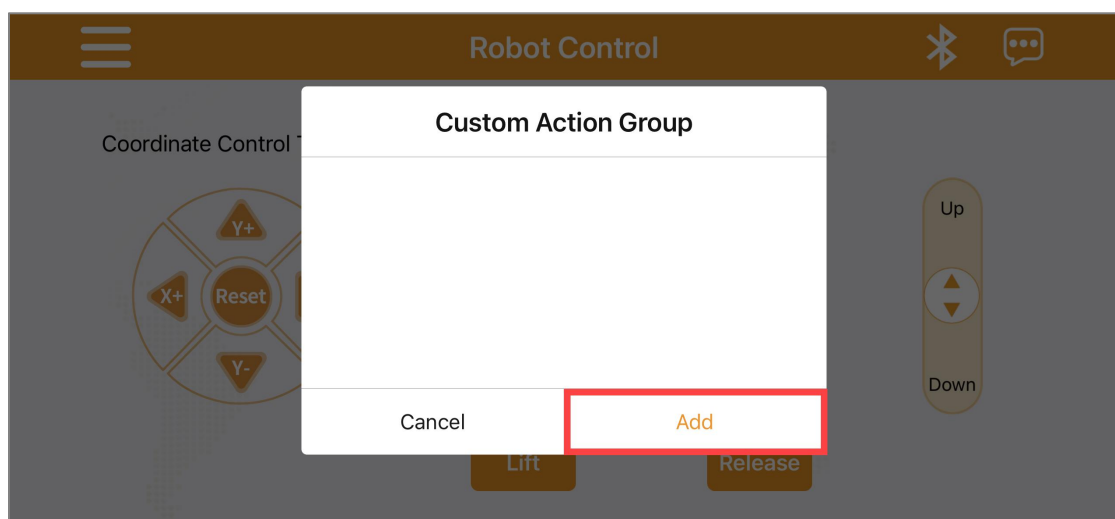

- 1) Please make sure Bluetooth and GPS services are enabled.
- 2) Please confirm No.2 action group has been downloaded to MaxArm. The specific operation method can refer to “**3.PC Software Learning/Lesson 2 Import and Download Action Group**”.

2.2 Operation

- 1) Turn on MaxArm and open “Wonderbot”.
- 2) Refer to “**2. Remote Control/Lesson 4 App Control**” to connect device.
- 3) Enter “Remote Control” interface.

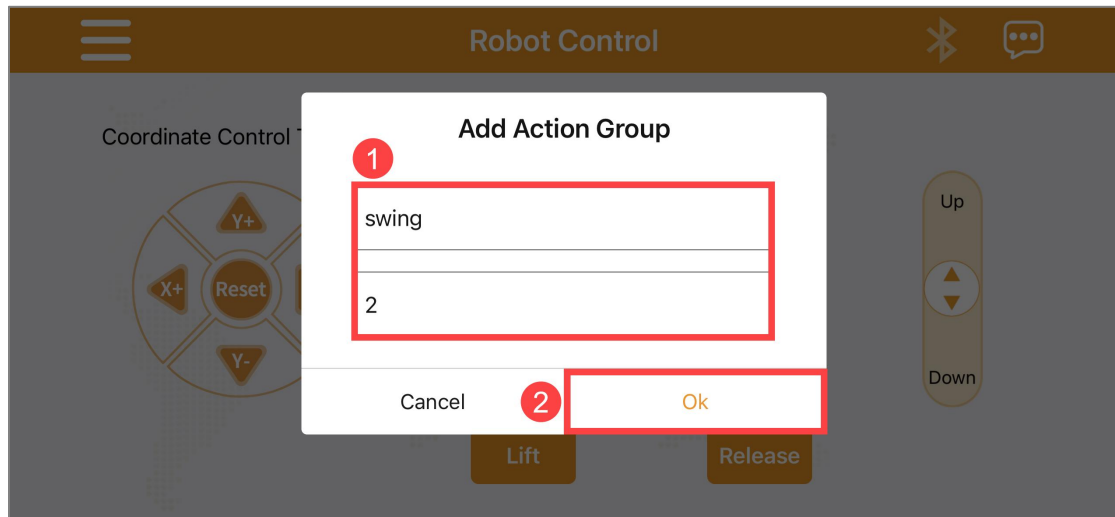

- 4) Click “Action group” in the main interface. Then click “Add” in the popup window.

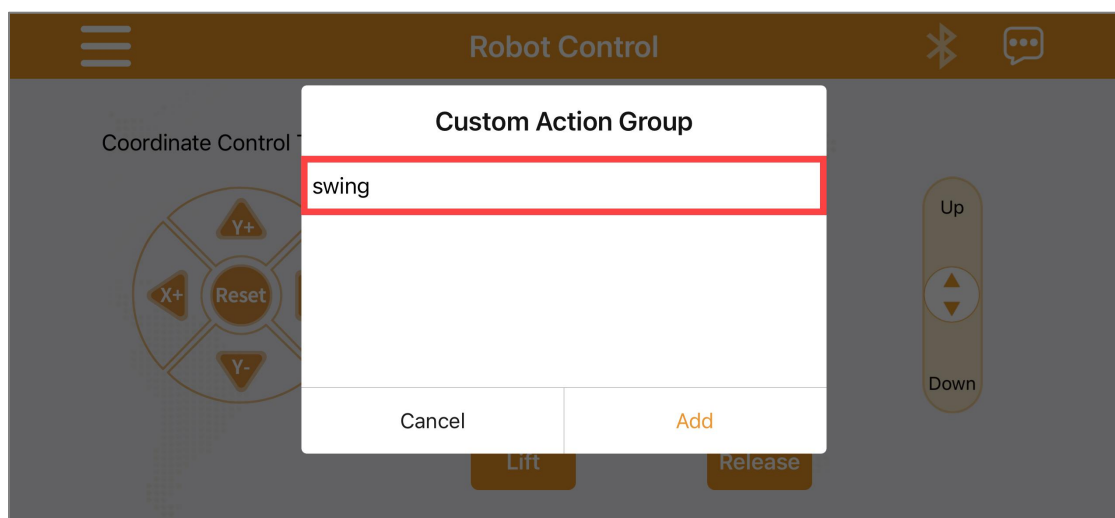

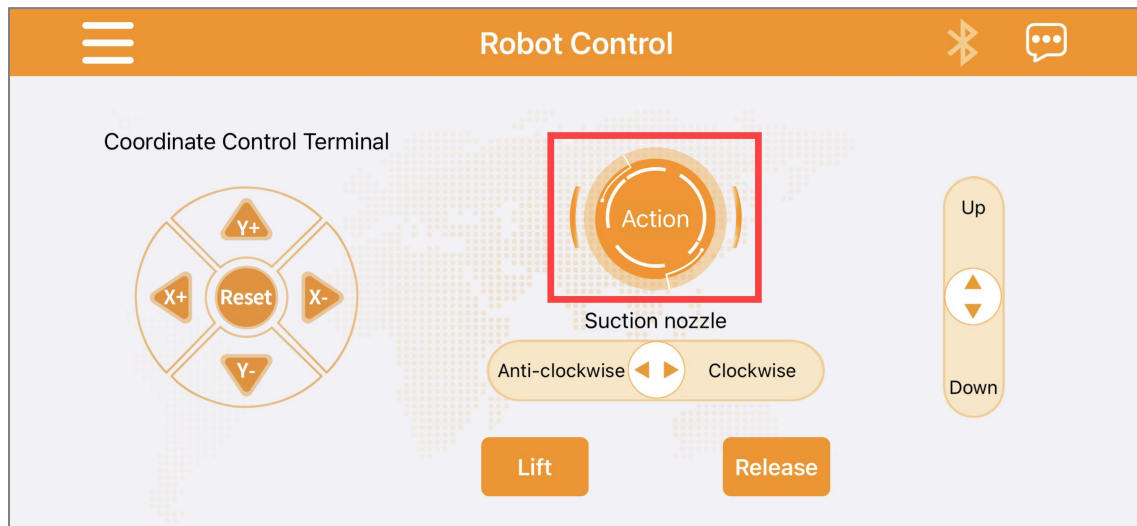

- 5) Input the name and number of action group in popup window.

Note: The action group name can be input arbitrarily but the action group number must be correct. Otherwise the action group can not be executed.

6) After adding, click “Action group” and click its name to perform once.

- 7) This step will be different between iOS and Android user. If want to modify or delete action group, long press its name and click “Delete” (Android user). If you’re iOS user, swipe the action group name to the left.
