

Lesson 7 Image Classification Integration with micro:bit

1. Preparation

Connect WonderCam to micro:bit Expansion Board Port 4.

2. Learning Objective

- ① To know the connectivity of WonderCam on micro:bit Expansion Board
- ② To understand the program logic.

3. Programming Plan

In this lesson, we will integrate the Vision module Image Classification function with the output from micro:bit Expansion Board. The program will first initialize the Vision module following by detecting features, classifying images and presenting results on the micro:bit Dot Matrix Display.

4. Programming

◆ Adding Extension

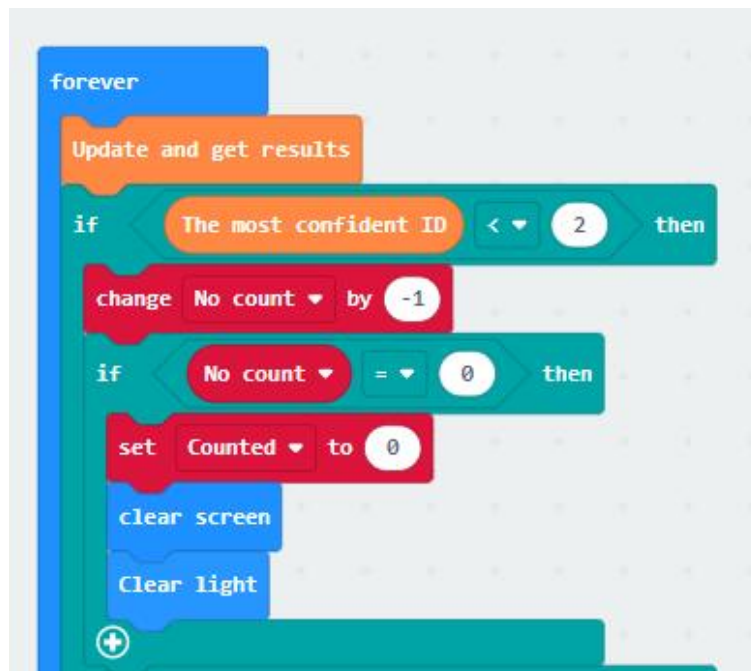

Go to <https://makecode.microbit.org/> and create New Project. In the MakeCode Toolbox, select Advanced, click on Extensions to add the following

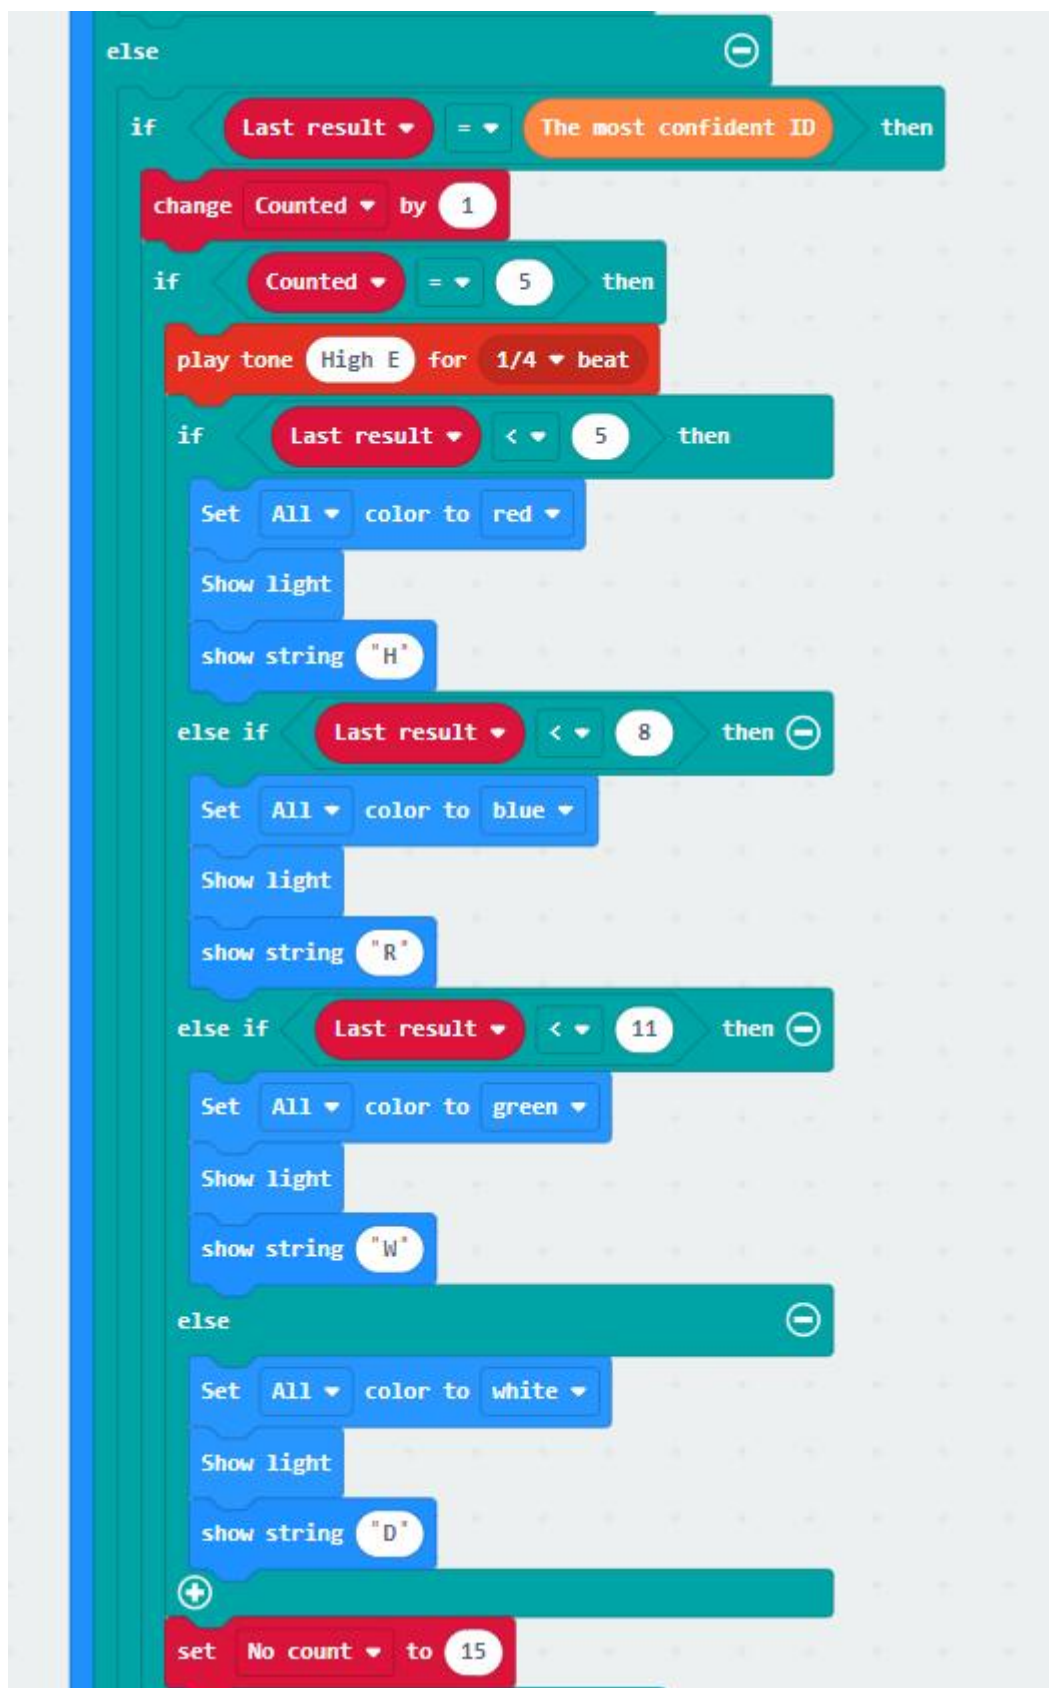

two extension packs:

<https://github.com/hiwonder/wondercam>

<https://github.com/Hiwonder/Startbit>

◆ Command Blocks

4.1 Pairing devices and program download

1) Connect micro:bit to computer.

2) Click on “...” located beside “Download” and select “Pair device”.

3) Click on on “Pair device” on the Pop-up screen.

Pair device for one-click downloads

1 Connect the micro:bit to your computer with a USB cable
Use the microUSB port on the top of the micro:bit

2 Pair your micro:bit
Click 'Pair device' below and select BBC micro:bit CMSIS-DAP or DAPLink CMSIS-DAP from the list

?

Pair device

4) Click "Connect" as shown in image below.

5) Once connection is successful, click "Download". During downloading process, the yellow light on micro:bit will blink consistently, do not disconnect or change USB cable.

6) When download is finished, the light on micro:bit will remain on and screen will appear Download completed message.

This PC > MICROBIT (G:)

Name	Date modified	Type	Size
DETAILS.TXT	3/22/2016 4:30 PM	Text Document	1 KB
MICROBIT.HTM	3/22/2016 4:30 PM	Chrome HTML Do...	1 KB

Tips: In micro:bit drive there are two files as show in image above. DETAILS.TXT records the data information of the micro:bit board. MICROBIT.HTM links to micro:bit official web page (computer need to be online when click).

5. Results

Tips: Ensure sufficient lighting in the surrounding and use white background for better recognition results.

After program is downloaded, connect micro:bit to Expansion board and switch power to ON. WonderCam will automatically start on Image Classification function. Place the card in front of WonderCan, micro:bit will display corresponding item classification alphabet.

Refuse item classification:

H - Harmful; D - Dry rubbish; R - Recycle; W - Wet rubbish
