

Lesson 5 Number Recognition

1. Instructions

Distance from Card to WonderCam camera should be between 15cm to 20cm. Ensure sufficient lighting in the surrounding and use white background for better recognition results.

2. Introduction to Number Recognition Function

Using the preprogrammed number recognition models to recognize the picture and present the corresponding number on display.

Note: Use the number template provided.

3. Number Recognition Operations

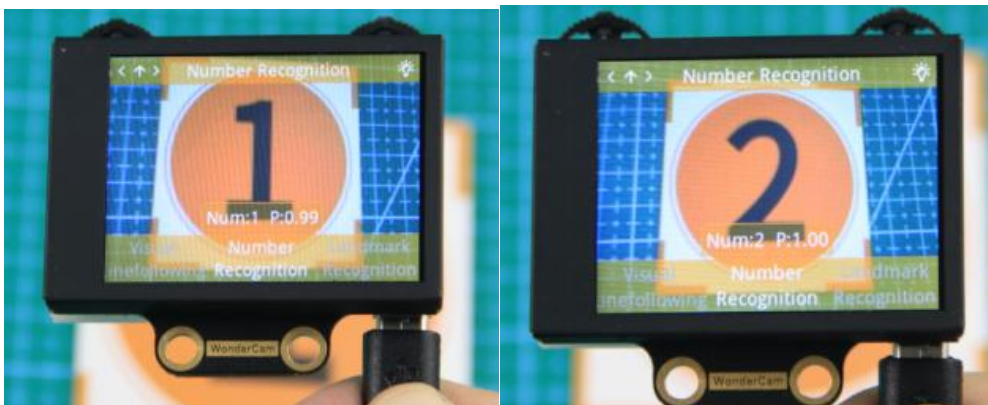

3.1 Enter Function

Push Navigation button to Number Recognition menu.

3.2 Recognizing Number

When in Number Recognition mode and using the number templates provided, WonderCam is able to recognize the number and present the corresponding time on its display. When in operation, a value will also be shown to signify the trust value. The highest value is 1.0 being closest matched.

Note: Distance from Card to WonderCam camera should be between 15cm to 20cm. Ensure sufficient lighting in the surrounding and use white background for better recognition results.

Card	number	Card	number
	1		2
	3		4
	5
